Village of Lake in the Hills Adopts New Comprehensive Plan

Lake in the Hills, IL— On June 12, 2025, the Village Board of Trustees adopted a new Comprehensive Plan that will serve as the guiding document for land use, development, sustainability, transportation, and infrastructure over the next 10 to 15 years.

The Comprehensive Plan replaces the Village’s previous plan, which was last fully updated in 2002 and amended multiple times between 2004 and 2015. Recognizing the need for a fresh approach, the Village Board initiated an 18-month planning process in late 2023, engaging residents, businesses, stakeholders, and partner agencies through open houses, interviews, surveys, and public meetings. The result is a modern framework that balances future growth with the Village’s family-friendly, sustainable, and prosperous identity.

The plan introduces innovative strategies, including redevelopment opportunities for the Lake in the Hills Roots area, dynamic mixed-use concepts along Randall Road, community branding enhancements, and forward-thinking infrastructure investments. Director of Community Development John Svalenka said, “The new Comprehensive Plan reflects the voices of our residents and partners. This collaborative effort sets forth a path for Lake in the Hills to remain a strong, vibrant community for years to come.”

The Comprehensive Plan can be viewed on the Village’s [website](#).

For inquiries related to the Comprehensive Plan, please contact Director of Community Development, John Svalenka, at jvalenka@lith.org.
